

Routemaster & Ballotini

Routemaster 9503 – Waterborne Acrylic Road Marking Paint

Suitable for use on:

- Virgin black top, old black top
- Concrete, wood, brick, paving and existing painted lines
- Roads, airports, airfield runways, car parks
- Factories and sport facilities

It has a very fast drying time, skid resistant and is resistant to diesel spillages.

Routemaster 9610 – Chlorinated Rubber Modified Road Marking Paint

Line marking paint for: Old black top, concrete, wood, brick, paving and certain existing thermoplastic and painted lines. Roads, airport and airfield runways. Car parks, factories and sports facilities.

- Resistant to abrasion
- Good medium for high reflectivity
- Chemical resistant
- Fast drying times
- Tested to BS6044 performance standard
- May be applied to most road surfaces
- Skid resistant

Routemaster 9612 – Single Pack Epoxy Road Marking Paint

Line marking paint for: Old black top, concrete, wood, brick, paving and certain existing thermoplastic and painted lines. Roads, airport and airfield runways. Car parks, factories and sports facilities.

- Resistant to abrasion
- Good medium for high reflectivity
- Good chemical resistance
- Fast drying times
- May be applied to most road surfaces
- Fuel resistant
- Good wear and anti-skid characteristics

Routemaster 9623 – Two Pack Epoxy Road Marking Paint

Line marking paint for:

Old black top, concrete, wood, brick, paving and certain existing thermoplastic and lines. Roads, airport and airfield runways. Car parks, factories and sports facilities.

- Good medium for high reflectivity
- Resistant to abrasion
- Superior chemical resistance
- Superior fuel resistant
- Excellent adhesion to Alkaline surfaces such as concrete

Ballotini Glass Beads

Ballotini beads aid the reflectorisation of the road marking paints. They are used in conjunction with Enfield Routemaster 9503, 9610, 9612 and 9623.

These beads improve road safety at night time and in conditions of poor visibility, they can also improve paint durability by 20%.
